AB INITIO POTENTIAL ENERGY SURFACES FOR H_5^+ AND CH_5^+

JOEL M. BOWMAN, ZHEN XIE, ZHONG JIN and BASTIAAN BRAAMS, *Department of Chemistry and Cherry L. Emerson Center for Scientific Computation, Emory University, Atlanta, GA 30322*.

I will describe new *ab initio* potential energy surfaces for H_5^+ and CH_5^+ and present some results of vibrational and scattering calculations using these surfaces.
