THE SYMPOSIUM: A PERSONAL PERSPECTIVE

ROBERT CURL, *Department of Chemistry and Rice Quantum Institute, Rice University, Houston, TX 77005, USA*.

The International Symposium on Molecular Spectroscopy at Ohio State University has been serving the spectroscopic community magnificently for sixty-five years. Many spectroscopists, myself included, made their very first meeting presentation here. In my case, that was a mere fifty-two years ago. Looking back my trips here have been filled with great experiences both personally and professionally. I plan to talk about a few of them.
