

Announcing: The 2019 North American Computational Linguistics Olympiad!

Attention all High School Students

The Ohio State University is proud to announce the 2019 North American Computational Linguistics Olympiad. The Open Competition will be held on Thursday, January 24th. Register now at:
www.nacloweb.org/register_student.php

NACLO is an educational competition in Linguistics -- the science of language. It challenges you to develop your own strategies for solving problems in fascinating real languages and formal symbolic systems. Do you have a knack for languages, logic and "computational thinking"? Would you like to try your hand at deciphering an ancient script or deducing the logical patterns of Swahili or Hawaiian? Maybe the Computational Linguistics Olympiad is the right challenge for you! Try the problem on the other side of this flyer. If you enjoy that one, try some more on the website:

www.nacloweb.org

Can you be a Linguist or a Computational Linguist?

Give it a try! Ask your math, language arts or second language teacher how you can participate in NACLO. Or contact your local NACLO sponsors at:

<https://linguistics.osu.edu/naclo>

NACLO is an academic competition sponsored by the US National Science Foundation, the North American Chapter of the Association for Computational Linguistics (NAACL) and others. Top scorers in the Open Competition on January 24th will be eligible to compete in an Invitational Competition. Winners of the Invitational Competition will be eligible to represent North America at the International Linguistic Olympiad in the summer. Thanks to the generosity of our sponsors, there is no participation fee for any NACLO event. More details about the event can be found on the national website at www.nacloweb.org.
