

Secret Arch

Hike along the Secret Canyon trail for about 3.5 miles. You will be past the David Miller trail turnoff and into Secret Canyon itself. If you look over to your right you can see the actual arch near the top of the canyon rim. As you continue along the trail you will climb a very steep hill and then drop down to a wide clearing that has many sawed logs and dead trees. The trail to the arch leaves on the right along a big fallen Ponderosa pine that is covering the trail itself.

Follow the trail over a small hill and then alongside a drainage. Trail crossed drainage and climbs up other side and keeps climbing. Continue up steep red rocks to arch.
