

## **Sycamore Lollipop**

Take Sycamore Dogie trail for about 1 h 20 min until you reach a steep slope down to a side wash crossing the trail. Note tank on your right early on. This is the point where you will rejoin the trail at the other end of the lollipop. Take this wash to left down to Sycamore Canyon. It will take you about 20 minutes to reach the main canyon. Turn left and work your way across the rocks downstream for 1.3 miles (about 50-60 minutes) At this point you will see a side wash on left that is fairly wide and has lots of trees growing in it. In the main canyon there are many large convoluted rocks at this place that make for nice lunch spots.

Work your way up side wash and eventually you will face a large high pour off. Go around that pour off along trail on the left side of wash. Continue up wash and look for cairns marking exit on left side. There are thin rock slabs at this point that make for a crumbly and slippery climb up. Climb up to top of ridge and keep to top of ridge until you get back to tank on main trail. There is an old fence line that you can follow along the top. When you meet main trail turn right to head back to parking lot.
