

Course Schedule - Autumn and Spring Semesters

The following information is based on the course offerings of World of Energy courses in 2012 – 2013. While this schedule is expected to continue in the future, students should check the OSU Master Schedule of Courses, which is available online, for the most up-to-date on information on Physics 1103 and 1104 courses.

We expect Physics 1103 to be offered Autumn semesters and Physics 1104 to be offered Spring semesters. Multiple sections of each course are offered. Students may take Physics 1104 without having taken 1103. Students enrolling in Physics 1103 or 1104 select a Tuesday/Thursday section or a Wednesday/Friday section. Classes meet twice a week for 80 minutes.
