$\qquad$

## Recitation Instructor (circle one): Moe Larry Curly Groucho Chico Harpo

Class time (circle one): 10:30 11:30
QUIZ \#1

1) The acceleration of a particle is given by the graph on the right. Below are possible graphs of position or velocity for the particle over the same time interval. Circle every graph that could be correct. There may be more than one correct graph.

2) A particle starts at the origin. Its velocity is given by the top graph.
Sketch its position in the bottom graph.

3) A particle's motion is given by the graph below. Some points on the graph are labeled.

a) For which point(s) is the particle's speed zero?
b) For which point(s) is the particle's acceleration negative? $\qquad$
4) Sam drives his car from A to B in a straight line taking 5.0 hours. For one-third of the total distance he travels at an average speed of $50 \mathrm{~km} / \mathrm{h}$. For the remaining two-thirds he travels at an average speed of 30 $\mathrm{km} / \mathrm{h}$. What is the total distance from A to B?
